

Find your **WillowEngine.ini** file inside the Documents folder, usually located here:

Documents\My Games\Borderlands 2\WillowGame\Config

To permanently disable the dark outline find and replace this line (under **[Engine.Engine]**):

DefaultPostProcessName=WillowEngineMaterials.WillowScenePostProcess

with this one:

DefaultPostProcessName=WillowEngineMaterials.RyanScenePostProcess

Final result

- + No more dark outline
- + No more vignette effect (slightly darker corners)
