

# RAINBOW MODE

## **This is the most immersive version of Wars in Skyrim**

- It doesn't change the Skyrim Gameplay.
- It has the fewest amount of fights.
- With this version, you won't be attacked by enemies at every step, and the encounters will usually patrol an area or stand guarding a point.
- But there's a rare chance for you to meet two factions fighting each other, or to meet a strong enemy.
- Less spawn points, and some chances to a spawn point to turn off.
- This way, quests and gameplay won't be broken, even by the very rare strong encounters.

**Use this version if you think there are too many spawns and fight with the other versions, but you still want to add some life to the Skyrim's landscapes!**
