For kitchen faucet repair, first thing you should give thought to regardless of whether you want to do the repair yourself or must call a professional for the similar. For those who have all of the necessary tools like wrench, pliers and screw driver, so you know the basics about repairing faucet, then you can definitely consider the task absolutely need hands.

#### Steps for Kitchen Faucet Repair:

- One thing you should do after leakage starts would be to shut the water supply when you take away the faucet. You can either shut the valve inside the sink or main valve in your home. And then make certain that water within the water lines are drained as well as the air pressure is released. This will likely also help in saving a lot of water which may happen to be wasted because of the leakage.
- You may then will disassemble the tap parts.
- Open the lever and remover fragments, or no in the faucet.
- Examine the washer and put it back with a brand new one. Also replace screws, just in case they're old and damaged too. The new ones you buy ought to be durable and of good quality.
- The next step may be the installing of washer and tighten it with all the screws. From then on reassemble the tap and make sure it's been properly fixed.
- Lubricate the thread in the stem. You may use lubricants like grease with the aim.
- The last step is to start the water supply and open the tap to ensure that the leakage may be properly repaired.

For those who have each of the necessary tools and equipments, then its not that tough to fix a faucet yourself. It's also possible to see what model of faucet can there be inside your kitchen and appear online for that set of parts. After that you can order exactly the same faucet online. Ensure that you buy durable faucets which will help to ensure that they do not get damaged in short duration. It can help you'll save both time and expense. If you think that

fixing the tap is a trial for you personally, you are able to consider the services of a plumbing service to fix things to suit your needs.
