

The screenshot shows the Intel Driver Update Utility application window. The title bar reads "Intel® Driver Update Utility". The main header is blue with the Intel logo and the text "Intel® Driver Update Utility". Below the header is a navigation bar with "Home", "Downloads 0", and "Installs 0". On the right side of the navigation bar are "Search Manually", "History", "Settings", and a help icon. The main content area is titled "Available drivers for your product" and shows "Windows® 7, 32-bit*". There are links for "Select a different product", "Select all drivers", and "Clear selection". A "Latest drivers" tab is selected, with a note: "These drivers are Intel generic drivers. They do not include customizations that your manufacturer might have added to optimize your computing experience." Below this is a table with columns for "Description", "Installed version", and "Latest version". A modal dialog box is overlaid on the table, titled "Intel® Driver Update Utility", with the message "No drivers were detected for your product." and an "OK" button.
