Virginia Baseball Shooting Hoax, Fake victim, Gabby Giffords given stage for lobbying gun-grab legislation. Jeff Flake Interviewed in CNN, notorious for fake news. Ron DeSantis says he left the field before the shooting started but CNN gives him time to spin a yarn. Noah Nathan (Facebook) had camera running showing Black SUV with driver door open and a couple of people standing vertical even as rapid sequence gunfire was heard. Nobody is ducking to escape stray bullets. Conversation seems oddly appropriate but could be scripted. Camera appears to reveal time of day somewhat later than the reported 7:15 AM shooting event especially for the GPS latitude on the Virginia ball-park. People casually milling around during intense gunfire is out of character for this shooting scenario.

VIDEO: At 12:15 near the end of the video a woman is depicted running with lanyard around her neck. The very short shadow reveals this video was taken far later than the 7:15 AM shooting and probably in the middle of the day with the sun directly overhead. The shadow is so short that it appears the scene was actually filmed at a much lower latitude than the DC area - probably closer to Florida. The woman is obviously not running in the GOP baseball field but on what appears to be a soccer field. Was gunfire over-dubbed into the audio like in Dallas shooting? Was this an exercise?
