

How You Can Choose **THE BEST ENGINE HOIST TO BUY**

When you want to get a good hoist, you have to know what they are supposed to carry and how much power they need to have. There are so many types of hoists out there that it can be very confusing to choose which one would be the best.

Knowing More About How Hoists Work

You can always find the best engine hoist once you are aware of what they should do and how they can carry things. There are also other factors that can affect your decision such as the items you wish it to carry and where you will use it for.

A 1-ton professional engine hoist can carry:

4,000 normal
sized baking
potatoes

50,000 teabags that
have less than 0.03%
of UK's daily teabag

320,000 A4 pieces

A 3-ton professional engine hoist can carry:

Half of a large stone in the Stonehenge

4 fully grown male polar bears

Around 73,180,000 grains of rice
