

## Angel Eye Camera Programs

### [Nicu camera system](#)

Angel Eye Digital camera Programs, LLC, was founded in 2013 with all the assistance from the College of Arkansas for Health-related Sciences (UAMS) BioVentures. Angel Eye patterns, develops and delivers Internet-based camera methods permitting mother and father and people to view and interact with their infant inside the neonatal intense care unit (NICU) through reside movie streaming and immediate, one-way audio. The Angel Eye technique uses a digital camera positioned in the baby's bedside so that parents and also other family members who can not be with the NICU can see the child 24 hrs per day by logging right into a safe account from their laptop, pill or smart phone. This system assists market bonding between mother and father and their untimely infants, who occasionally really need to stay in the healthcare facility for months or months.

In 2006, UAMS developed the very first prototype for Angel Eye with webcams mounted on IV poles next to toddler beds. A second generation from the technologies employing a bed-mounted camera unit was developed in 2009. Three many years afterwards, Lehigh Valley Clinic in Allentown, Penn., became the first wellness treatment facility exterior UAMS to deploy the technology. UAMS recognized BioVentures and its Technology Licensing Workplace to aid the commercialization of UAMS engineering and assist while in the startup of recent organization enterprises determined by UAMS technologies that interprets its investigation endeavors such as Angel Eye technological innovation into merchandise that benefit human wellness. In 2012, the Arkansas Advancement Finance Authority, by means of its Arkansas Seed & Angel Capital Network program, provided \$500,000 to TriStar Technologies Ventures in Nashville, Tenn., to invest in Angel Eye Digital camera Systems. The Angel Eye Camera Techniques LLC was organized in January 2013 to exclusively license this proprietary technological innovation from UAMS.

Since 2013, Angel Eye has grown to include 40 partner hospitals across the country, with several pending installations. Angel Eye is headquartered in Little Rock, Arkansas, with offices in Nashville, Tennessee, and is exclusively distributed by International Biomedical.
