#60: Revelations about the steemit scam! All the truth revealed!

stopsteemitscam

April 19, 2020 at 9:10 pm

This famous scam is tracked by the Anonymous to help the victims of their sociopath trolls abusers.

https://www.jpit.workers.dev/1jpbl

Steemit acts like a ponzi but a ponzi which pays with new created fake 'currency' so it will go on like that until their victims will understand this.

Steemit is not a blockchain because it is NOT centralized.

Cryptocurrencies are 'artificial' currencies as long as they are not recognized as having a real value. Steems are producted permanently UPON REQUESTS. It's not sustainable! Its creator is either a scammer either a BIG IDIOT 😉

3 years ago, steemit members/victims were convinced it will replace all the real social networks (facebook, twitter, youtube,etc...) 3 years later, you see any change? 😉 See "I am leaving DTube and Steemit. DTube has failed to even meet the basic expectations of a video streaming platform." at https://www.reddit.com/r/dtube/comments/bjpgj1/i_am_leaving_dtube_and_steemit_dtube_is_bad/

#42: November 17, 2019. Let's see how Steemit is acting. John upvotes Peter => John earns 'money' and Peter earns 'money'. Hummm... It sounds weird... Peter upvotes John => Peter earns money and John earns 'money'. Yes, it's more than weird! It looks like a ponzi. Where does this 'money' comes from?? Even if Steem value is increasing, it does not explain why more and more Steems are distributed among members. When an account is created, it receives a 'delegation'. One more time, Steems are created on demand. This is NOT SUSTAINABLE. It really looks like a ponzi where 'money' is artificially created in order to avoid a collapse. Anyway, this ponzi-like cannot last. It's unfair, cheating and not honnest.

Maybe you think that miners/witnesses are creating Steems? Not at all. They are PAID because they manage the blockchain processes but they DO NOT CREATE Steems.

Are you looking closely at https://steemblockexplorer.com/@steem ? For some months, Steemit is undelegating more and more unused accounts. Finally, they have understood that their weird system is collapsing? They were hoping that Steem will have such a big succes that they will stop to act like a ponzi and move on to a real honest business?? This cheating strategy was planified since the beginning? Most certainly.

So, for some months, Steemit is getting back a lot of Steems sleeping on unused accounts. But, it's not enough!! Steemit needs more and more Steems and cannot create indefinitely more and more Steems! The situation is becoming very very critical!! **So critical that since the beginning of this month they have stopped to valid new accounts!** A few accounts have been created but they were validated before this month. On the other hand, Steemit is claiming more and more accounts because they MUST create more and more new accounts. Can they admit they cannot create more accounts because they lied to their members about the way they create Steems on demand?? Sure, they can't do that. **They will never admit that their fake cryptocurrency is acting like a ponzy since the beginning.**

So, Steemit needs more and more Steems which they stopped to create artificially. <u>In brief, Steemit and its fake cryptocurrency will collapse.</u> It's just a question of time.

#41: As commented below at https://steemit.com/steem/@steemitblog/blockchain-update-platform-independent-state-files most of the rewards are going to some closed circles abusers. It's unfair and it shows that Steemit will never success. Steemit is a chimera abusing their naive and credulous members.

Unfortunately, most of the sociopath trolls are part of these famous closed circles, abusing other members for unjustified reasons.

Tell what for think about Steemit and you will be harrassed by these sociopath trolls. Is this free speach? Is it fair?

More about the viability of Steemit:

* Less of 50% (very very optimistic statistics) of new members are activating their accounts and <u>more of 90% new accounts will never be effectively used by their owners...</u>

* Most of active accounts will stop to be active after 2 years. They understood that Steemit is only a dream for naive and credulous victims.

* After 3 years, Steemit has still not replaced all of the real social networks like some stupid fans are still claiming.

* Steemit is a centralized system, not a real blockchain.

* STEEM will never be recognized as a real cryptocurrency.

blake.letras (53) ▾ · last month (edited)   [-]

Well, in all fairness, if you spent $5000 and a few years later the platform still has only a little over 11,000 users that are minnow and above you might be pretty unhappy about that.

As @artopium points out, the whales are keeping each other rewarded or rewarding in very small circles most of the time. If they were really spreading their votes around it would likely not be just 11,000+ in minnow and above. But the disparity due to small vote circles is keeping Steem small, while in the short-term being profitable to whales. That is a legitimate issue for someone to complain about.

#33: Latest news:

1: Steemit needs fresh real money so it needs more members but more members means more steems to delegate.. And new members are hesitating to put real money in this fake cryptocurrency. It's a vicious circle and it's smelling like a ponzi scheme.

2: POWER DOWN, POWER DOWN and POWER DOWN!! As soon you earn some steems, Steemit undelegates the same amount in your account.. More and more members are angry.

3: Accounts left 2 months or more are fully undelegated. Steemit really needs more money! After more than 2 years, the admins finally understood that producing STEEMS every time they need will result in a decreasing of its value???

4: STEEM has never been recognized as a cryptocurrency by thecryptocurrency community because STEEM looks like a ponzi scheme with a centralized blockchain. Miners are more working for this poor stupid ridiculous social network than working for mining the STEEMS.

5: New members wants to test before 'investing' real money. With a free account with delegation, they can post interesting contents during months for earnings only dust, expecting some small rewards from whales. YOU WILL NOT EARN ANYTHING WITHOUT SPENDING YOUR HARD EARNED MONEY IN THIS SCAM.

6: Small rewards are still not paid maybe because the STEEM value is decreasing after the 7 days... ?

7: Every day, the value of STEEM is dropping, dropping and dropping! Soon the end?

#32: A Steemit influential member reveals his deep disappointing about Steemit, the admins and their utter contempt of the members : https://steemit.com/steem/@jesta/the-recent-controversy-between-steemit-inc-and-the-community-the-premine-control-and-where-it-leads-this-blockchain

#31: Free registrations are back! Steemit needs more fresh real money after the HardFuck!

#30: Here is a summary after the HardFuck 20:

1: It's no more possible to create new free accounts. Now you must pay with real money

(with an exchanger) or create a claimed account if you already have an account with a VERY HIGH Resource Credit amount or by paying a fee. Steemit needs more money?

2: When you get an account, the delegated amount is decreased as soon as you earn some STEEMS. Steemit needs more money?

3: The delegated STEEMS are canceled for inactive accounts! Steemit needs more money?

4: The least: More accounts have their rewards not paid! After the pending 7 days, the amounts of rewards are reset to ZERO and no reward is paid.. Steemit is robbing the rewards! Steemit needs more money?

More and more members are lefting Steemit. Steemit is complex, not friendly, not convenient, undocument, a very poor communication, a very poor interface, a very poor complex not friendly text editor, etc... and full of trolls abusers flaggers sociopaths. How they can call this bad joke a real social network??

Steemit is in trouble! It seems they need more fresh money. They had created STEEMS each time new accounts were created. This is an artificial way to create 'money'. STEEMS are not created by 'mining' but artificially created when people was joining. It's not a real cryptocurrency. It's more a virtual currency with no real value. When people will understand that, the value of STEEM will drop dramatically. Has Steemit understood that? Apparently YES. This explains the 4 points above.

Steemit is turning into a ponzi scheme.

#29: Merry Christmas to all our friends and Helly Christmas to all the trolls abusers sociopaths and scammers!

#28: As we already stopped the sociopath https://steemit.com/@abusereports the other sociopath https://steemit.com/@johngreenfield has gone away! Sorry.
Looks like something went wrong on our end.
Head back to Steemit homepage.
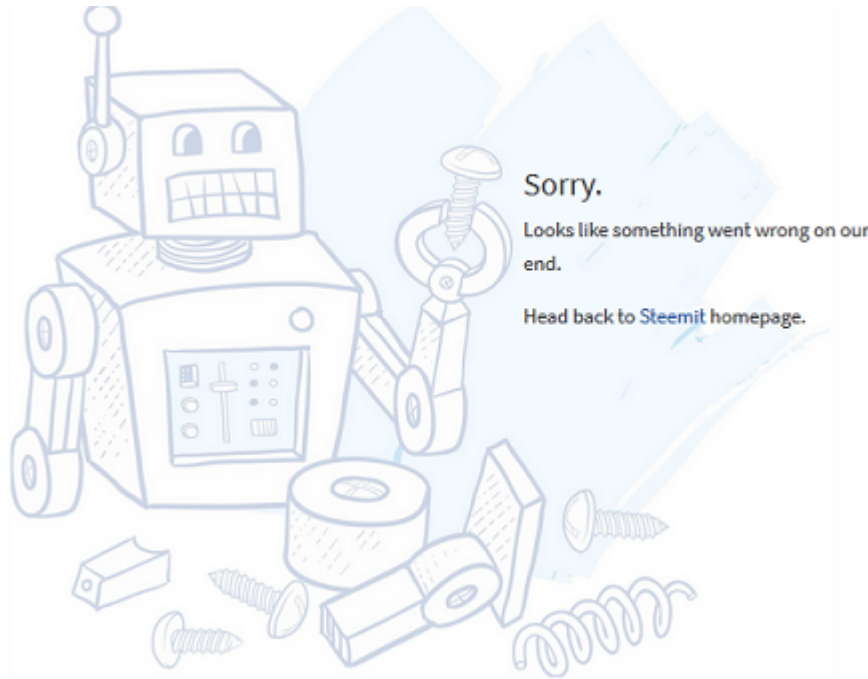

#15: One of our top troll @patrice is showing one more time his real face of sociopath with his troll bot @mack-bot :

Transfer 0.001 SBD to patrice

@patrice honestly your thinking is too much great. I personally encourage you. If I have effort I obviously helped you from my deep mind. You done the right thing. I appreciate your thinking and plan keep going on.... this community needs member like you. make decent and come back with beauty of blogging. If you can please change the rules, that now steemit isn't for good content.... It is all about whales zone. every who has sbd/steem or sp gotta go in the hotlist in fact trending list too. I am not telling that posts isn't worth of it but there re too much better content in the community we should take care of them too. [And last but not the list, It its my humble request that @mack-bot already pointed many steemians where some are innocent or even don't know why this is happening with him. So please after finishing @mack-bot 's current project remove them from your blacklist.] I am commenting through my friends steem id cause @mack-bot cracked me too. and now If I comment anywhere the bot also downvote there too. I am newbie... I requested my total group/community that all of their id's voting power spend on me and help me to grow up in reputation 50+. This is my dream. My community appreciate me and helping me, I also gone to reputation 43+ in the mean time @mack-bot crack me and my reputation is now 39/38. I am so upset. If you can please help me. opps sorry.... My nane is tanisa and my id is @tanisa. with me without any reason @mack-bot blacklisted my friend @tasif too. I know you are busy enough. But it is a poor & helpless girls request that if you can please helo us.

And 45894 fans

And here is our special 'delicious' report about @abusereports the number one Steemit troll !

@abusereports is using a bot to track and report members self-voting, multiple posting, multiple commenting and other '*unacceptable behaviours*'. Sometimes, some other members have reported his criterions are themselves abusive and based on nothing concrete. In plain language, they report this member to do a bad and stupid '*mission*'.

Now, we show you that this fucking troll is the top most fucking stupid Steemit abuser:

First, look at this screencopy (before it's deleted..) at
https://steemit.com/abusereports/@abusereports/self-voter-list-2018-04-22 :

His own bot has reported himself to be an abuser!!! Of course, because he is an abuser!! So funny to see him reporting himself!!

Now, look again at the blue box on the screencopy above. He was reported to be a '*large self-voter*'. This fucking member is reporting the large self-voters but **he is himself a '*large self-voter*'**!! And that's because he's self upvoting **ALL HIS POSTS AND ALL HIS COMMENTS!!** (And he's also a spammer because he posts comments on all the posts/comments of members he is '*blacklisting*') Here is an example: (You can see yourself at https://steemit.com/abuse/@abusereports/flag-report-2018-04-21) (He has recently stopped to do that. Maybe, he was feeling guilty himself to do the same '*bad things*' he's reporting)

So, you can see how this troll is himself the top Steemit troll!

What to think about his followers and other fans who help him? Are they so stupid to not see themself this guy is an abuser and probably laughing at all his stupid helpers? Of course, they are stupid.

Expect massive cyberattacks.
War is declared. Get prepared.
