

16 Gadgets to Ease Your Dad's Daily Routine

Fathers are practical creatures, honed by daily routines. With Father's Day coming up around the corner, we have a few suggestions to surprise your dad with and ease his daily routine! We look up to our fathers for their sense of practicality, discipline and routine. They are measured and wisened creatures of habit. Gifting fathers is usually met with questions about the gift's practical use, and we end up looking like fools. We know they'll cherish the effort and not the gift. Don't worry, this time we got your back.

1) **Fitbit:** Our fathers have always boasted about walking long distances to reach their destination, be it school or their workplace. Fitbit will help him verify that claim!

2) **Philips Trimmer:** The Philips Trimmer will help Dad achieve his desired beard/shave/moustache with the speed and precision of a barber.

3) Amazon Echo: We're sure you've lost the movie/tv-series Vs cricket match argument with your dad at least once. Amazon Echo's Alexa will ensure you don't lose that match again.

4) Samsung UHD TV: Speaking of cricket and smart decisions, here's one. Dads love the cricket season. Why not give him a full HD smart experience with Samsung UHD smart TVs? We know he'd love the immersive feel, especially this World Cup season. Get him one before Finals and share the experience by inviting his friends over for a big boys night!

5) Samsung Galaxy A50: Your dad would love to spend some quality time speaking to you on video chat, with the Samsung Galaxy A50's HD 25 MP front camera.

6) Carvaan: Make your Dad the throwback king of his dad group, with the Carvaan boombox. He's totally gonna lose his Gulzars on this one.

7) Nikon D3500: Dads love capturing memories, and a good Nikon is sure to make him click-click crazy!

8) JBL T500BT: Bluetooth headphones make perfect work-out partners. Lock your Teddy-bear dad in the gym and throw away the key.

9) Amazon FireTV Stick: Unlimited entertainment streaming with for a dad who loves to watch movies. Goes really well with that TV we mentioned before.

10) Dell Inspiron 15: Dad using the same worn-out laptop for the past decade? Time for an upgrade!
