

How to be a full Stack Developer? Read the Key Points

HOW TO BE A FULL-STACK DEVELOPER

LEARN THE TECHNOLOGIES

By heart all the technologies related to front-end, back-end, programming languages needed, basics of design, learning paths, etc.

TAKE INTERNSHIPS

Once the skills are developed look for internships to understand the industry and try your hands on it. Use internships to solidify the experiences.

BUILD A PORTFOLIO

Post the experiences earned, build a sound portfolio mentioning all the roles played and responsibilities held

PREPARE & APPEAR FOR

INTERVIEWS

Gather interview questions and start preparing for the answers. Look for jobs as per your niche and apply for them, attend interviews, and grab your job.
