How are APK files installed? Normally, APK files are installed automatically specifically if the apps originate from the Android market. Otherwise, you just need to save or copy the file in your Android gadget's memory. Once you've finished installing, make sure you manually update the file by exporting the new file, and replica to the Android device's memory again.

Where can free APK files be seen? You may use a highly reliable search engine for example Google to enable you to search for free files of games, apps, and widgets for all of your gadgets running on Android system. Use "inurl:htm -inurl:html intitle:"index of" apk", "inurl:htm -inurl:html intitle:"index of" apk games", or inurl:htm -inurl:html intitle:"index of" apk angry birds". You may also input "site:xda-developers.com apk download". Needless to say, you can also try the Android Market, and also other websites that specialize in promoting Android based applications. Always remember that there are specific regulations and rules that govern apps ahead of approval and release out there. A number of criteria along with that developers have to satisfy. Be aware that alternative party apps can always obtain manual installation of APK files.
