

How to add custom ringtones on android phones

Android system has all the features we need to add custom ringtones for all our incoming calls. We can choose one ringtone for all the calls or a specific one for every caller. We can also set different ringtones for specific people in our contact list. In our android phone, there are pre-installed ringtones that we can choose from the settings.

How to set custom ringtone in settings

Open the settings on your android phone. Tap the sound section. You can also type ringtone into the search bar at the top of your settings app. Then tap the phone ringtone. Select the system's sound picker app instead of the file manager. Tap the custom ringtone you added to the ringtone folder. Tap save or ok. If you don't see any of these two options on your android phone then tap the back button to exit the ringtone picker. If your custom ringtone has been set properly, you will see its name underneath the phone ringtone.

How to add a custom ringtone to a contact

You can also choose a specific [mobile ringtone](#) for a specific contact. This is useful especially during your work or duty hours. You can answer your personal calls instead of missing these calls. For this open the contacts. Tap the contact you want to set a custom ringtone for. Tap the three-dot menu icon in the top right corner. Tap set a ringtone. Select the custom ringtone you want to set as the mobile ringtone for the contact. Then simply tap save or ok. If these options are not available then tap the back button to exit the ringtone picker.

How to set an MP3 file for use as custom ringtone

Sometimes we want to add only MP3 ringtone as a mobile ringtone or as a notification alert. For this purpose copy the MP3 files to your phone. Go to settings then tap the sounds and go to device ringtone. Tap the add button to launch the media manager app. Select a music player, you will see a list of music files stored in your phone. Select anyone you want to set as custom ringtone and tap done. Now the selected MP3 music will be your custom ringtone. You can also set a custom MP3 ringtone for a specific contact. For this launch the contacts app and open the contact's info page. Scroll down to find the ringtones section. Tap on it and a dialogue box will appear with three options. Select go to my files and find your desired MP3

file. Select your favorite one and tap done to set this as a custom ringtone. That's how you can set the MP3 track as your custom ringtone.

Final thoughts

No one wants to miss important calls. For this, you set the mobile ringtone as an alert sound. Sometimes you don't want to receive many calls but during this, you miss the important call of the specific person by ignoring the others. To get rid of this problem you can also set a custom ringtone for a specific contact.
