7/7: Europe's terror scam -the final clues?

http://www.team8plus.org/forum_viewtopic.php?9.879

By ewing2001

Thu Aug 18 2005

Dear correspondents,

in december 2004, my other yahoo account was shutdown without any warning. I lost 1000s of email addresses.

Only a few days later our website at inn.globalfreepress.com was hacked for the 5th time and my admin had to retire.

In the same time, an electronic shutdown in our TV studio destroyed my system files from my Linux Box.

These and other political irritations within the 9/11 truth movement had been one of many reasons, why i retired in january 2005, and turned both daily news portal and weekly blog into archive modus only.

I decided also to retire from 9/11 research and -activism and leave INN World Report.

I only remained with team8plus and some mailing lists. The following article will be the only exception for this year and it's concentrating on the 7/7 attacks only.

I continue to doubt that the controlled opposition within this movement will be exposed in a proper way.

My respect goes to those individuals who are still not too scared to speak out on our general deceptions within our society.

This week, i was finally able to recover most files from my linux box. Therefore hello to everyone, i wasn't able to contact for 6 months.

I will remain in isolation. Good luck everyone :)

Nico Haupt aka ewing2001
