When you think about the reasons why people embark on tattoo and piercing journeys, you rarely think about there being an actual reason for it other than trying to look cool. If we're honest, a lot of see custom ink and some serious body jewelry, and the first thing that we think is, "Man, that's so cool!" As it turns out, tattoos and piercings have a long history around the world, and the reasons for these types of body art and modification are more than just skin-deep.

From a strictly Western perspective, the origin of tattoos and piercings had more to do with nefarious characters or seafaring military men who found themselves on the business end of one needle or another, but what they took away marked them for life. They seemed to identify themselves as the kind of person you didn't want to mess with, and as such, tattooing and piercing really found itself on the outside. Only bad folks and carnival "freaks" who cared nothing for their appearance would dare desecrate their body.

Times have certainly changed in the Western world. Due to popular media and television shows showing tattoos as a cool subculture, body art and modification skyrocketed in popularity. Think about how many people you know who have a little custom ink or jewelry somewhere on their body. It's also become very fashionable with tattooing tending to be kind of a 'look' for modeling for some designers.

The crazy thing is that there are still somewhat complicated ideas behind tattoos and piercings around the world. There are countries that had long-held traditions about marking criminals with tattoos so that they could be readily identified and known to be a problem. Over time, the

markings lead to the use of tattooing as an identifying mark for organized crime in some locations.

For others, using ink was part of religious practices. There was a level of mysticism and sanctity associated not only with the person being tattooed, but also with the tools & design being employed as well as the person doing the work. These practices were also associated with a rite of passage for both boys and girls. A transition into adulthood was marked quite literally on the skin.

It's important to note that piercing has also had an interesting story around the world and a history going to ancient times. There were cultures that believed piercings showcased the stature of individuals in society as well as the battlefield. Other research has encountered records where piercing was used as a means to help deter sexual behavior for either athletic prowess or to preserve a singing voice. Oddly enough, even though there is information showing piercing as a status symbol for the elite, piercings also had moments as status symbols identifying the lowly and less refined in society. In fact, even slaves in certain areas of the world found themselves physically marked to show where they stood on the social ladder. Tattoo and piercing traditions are important to think about because it shows us just how much the meaning of these artistic markings can change over time. In the same way that language adapts to new environments, so, too, does the overall perception of tattoos and piercings.
