Effects of **SMOKING** during **PREGNANCY:**

- ✓ Lower the amount of oxygen available to you and your growing baby
- ✓ Increase your baby's heart rate
- ✓ Increase the chances of miscarriage and stillbirth
- ✓ Increase the risk that your baby is born prematurely and/or born with low birth weight
- ✓ Increase your baby's risk of developing respiratory (lung) problems
- ✓ Increases risks of birth defects

Don't make your health at risk, during pregnancy smoking is very harmful, even passive smoking becomes very injurious to health in pregnancy. Get consultation from [the best gynecologist in Indore](#) or you call now to book an appointment : 9826385850
