

Alternative Suture for Skin Closure | Skin Closure Suture

A trip to the doctor can be scary for a child, especially if a cut requires stitches. It is difficult for parents too as we try to calm our children. Thankfully there is microMend that offers a suture alternative for wound closure. Visit our website for more details at

microMend® Skin Closure Devices

- Painless Application - No Need for Stitches
- No need to use sedatives on children to calm them down for pre-stitch injection.
- Parent and child are more at ease in the ER because no needles or injections are necessary.
- The parents can remove at home once the wound heals - NO return visit to the doctor to take off microMend.
