

# The Ultimate Guide To Home Decorating Ideas Using Marble

Marble is timeless and is one of the most popular options that comes to mind when looking for home decor ideas. It is widely used in some of the world's most iconic monuments, and in offices and homes for that refined look. One of the most important benefits of marble is that it looks stunning while being highly durable at the same time. It's also extremely versatile and has many applications in every room in the house. From marble walls and marble floors to marble wall cladding, kitchen backsplashes and accent wall panels, it makes for a chic addition to any space.

The right cut and quality of marble is essential. We at The Quarry have the [best Italian marble](#) that's handpicked from 31 countries and 167 quarries across the world. Each slab is cut and polished by generations of Italian craftsmen to the world standard of 20mm thickness. Our expertise is in crafting [bespoke luxury marble solutions](#) for your interiors, based on your specific needs.

There are different types of marble used for different rooms, and our curators at The Quarry Gallery will help you choose the right kind based on your needs.

## 1. As a bedroom highlight:

Get that stunning boutique hotel look with marble walls in your bedroom. Keep it minimal with [Dalmata](#) from our Flaunt Collection. Or, if you'd love a statement wall while letting the rest of your bedroom decor be minimal, try a gorgeous, patterned marble wall with [Azul Macaubas](#) or Avocado Vert. A polished marble wall creates a soothing effect and transforms your bedroom into a cozy and chic space.

## 2. As a living room accent:

An accent wall creates a focal highlight point for your living room without having to make any significant changes to your decor. This is where you can add personality and depth to the space by choosing marble that complements or matches your overall colour scheme. Different types of marble can give you luxe finishes, from veins, grooves, flutes and more to further enhance the beauty of your selected marble walls.

## 3. In the bathroom:

Instead of artificial marble tiles, you can select a natural stone like an exotic granite or quartzite to add a luxe look to your bathroom and also make it look bright and spacious. We recommend our stunning range of whites from the Italian marble collection that includes Carrara, Laas Authentico and Statuario. Or you can also choose from 33 exotic colours. When it comes to applications, you may pick a marble accent like a marble sink, marble countertop or a marble bathtub.

## 4. In the kitchen:

Vertical applications like a marble backsplash are an excellent way to showcase the gorgeous veins and swirls of the marble. If you have a kitchen island, a marble countertop will add elegance to the kitchen overall. Regular care and maintenance will ensure that your kitchen marble surfaces stay protected and last long.

## 5. In your prayer room:

Your prayer room is your personal spiritual sanctuary, and you can use marble to create a lovely alcove for your prayer essentials. You can also create a marble wall design in soothing designs to make the space feel calm and inviting.

## 6. As minimal objets d'art:

If you'd like to first try out marble as a home decor material, consider this. Create an instantly luxe effect to any space by incorporating it into objets d'art such as a side table with a marble top, marble vases and other marble home accessories.

The ways to incorporate marble into your home interior design are many, and we'd love to assist with finding the right cut, finish and type of marble for your specific needs.
