WHAT IS MULTI-CARRIER SHIPPING SOFTWARE?

In simple terms, multi-carrier shipping software is a full-featured web-based shipping solution that is designed specifically for multi-carrier shipping Businesses such as e-commerce. It allows e-commerce firms to analyze prices and delivery times, process bulk orders quickly, reduce shipping costs, produce shipping labels, track shipments, all from one location.

Mostly every part of the shipping business is connected by multi-carrier shipping software. It connects directly to your e-commerce platform, allowing you to monitor order information, evaluate the best shipping rates from a variety of carriers, track shipments, alert customers of their delivery status, and many more.

Trying to compare prices on each separate carrier's website may be a time-consuming and complicated procedure. Once your business grows and your e-commerce sales increase, having multi-carrier shipping software will save you a lot of time and money so you can focus on other areas of your business.

A good multi-carrier shipping solution has some common features like:

- Enhance your courier and logistics business.
- Reduce shipping costs and expand reach.
- Easy integration with carrier companies.
- Profits from the Lowest Cost Recommendation Engine.
- In only a few clicks, you can process multiple orders.
- Lower return costs when compared with forwarding costs.
- Reduce efforts by automating shipment.
- Dashboard for Billing Reconciliation.

What are the Advantages of Multi-Carrier Shipping Software?

Allowing e-commerce businesses to compare charges and shipment times of all carriers and deliver numerous items throughout the world at the minimum reasonable cost is the most appealing feature of [multi-carrier shipping software](#).

Here are some other benefits of using a multi-carrier shipping solution:

Decreases the Cost of Shipping

Having a tool that allows analyzing charges will help you to select the carrier and channels that are appropriate for your company. Multi-carrier shipping software can save you money on doorstep delivery and lower your overall shipping expenses.

Using a multi-carrier shipping software like Courier Mitra can provide [70 paise per booking](#). These deals can save e-commerce businesses a lot of money in shipping costs every year.

Easy Carrier Integration

The ideal multi-carrier software integrates seamlessly ensuring that your whole operation is uninterrupted.

Multi-carrier shipping software allows you to organize all of your orders in one place, then analyze and get the fastest delivery for each parcel.

Quick Deliveries

The right [multi-carrier shipping solution](#) will allow you to improve your shipping strategy by offering faster delivery at the most affordable rate.

The majority of internet buyers want their orders to arrive in less than 48 hours. The multi-carrier shipping software allows you to select the carrier with the fastest last-mile delivery option. You'll be able to compare the quality of service easily in one spot because multi-carrier shipping software solutions allow you to connect to a large carrier network.

Automated Shipping

Manually entering data for each individual order may be both time-consuming and prone to human mistakes. Humans are prone to make mistakes especially when we have to fulfill thousands of orders. Here multi-carrier shipping software will help you by automating manual operations like shipping, data entry, and many more. That will result in reduced efforts, zero human errors, and more time to focus on other important tasks.

Real-Time Tracking

Besides tracking where your packages are, [multi-carrier shipping software](#) allows you to see information about the order's origin, the cost of shipping, and so on.

Customers will have more trust and confidence in your company if you can quickly share tracking information with them or immediately look up their order status.

Processing Bulk Orders

As your business grows, your sales also increase. So thus, processing orders manually can cost you a lot of time which could be a huge headache for your business. That's where the ideal multi-carrier shipping software comes into play, it will help you in processing bulk orders in just a few clicks.
