

# What is Multi Vendor Marketplace Module?

The multi-vendor Marketplace plugin is a tool that whenever is integrated into any eCommerce website. It converts eCommerce websites to Multi-Vendor Marketplaces like eBay, Amazon, etc. On this eCommerce website, many vendors sell their products by getting registered themselves on the eCommerce website.

When the seller gets registers themselves, then the admin approves the seller.

Admin can also sell his products along with Vendor products.

Admin can assign products to vendors also.

## Process of Multi-Vendor Marketplace website

- Vendor Register itself on the eCommerce website.
- Vendor Pays subscription amount if applicable.
- Admin Approves the seller.
- Vendor lists their products.
- Admin approves the product if required.
- The vendor starts selling the products.
- Customer buys products.
- Commission is calculated
- The commission is the amount that is deducted by the admin on each product sale of vendor products.
- The commission is calculated by Vendor Store wise, Product category-wise, or global value.
- The commission is calculated when both admin and vendor order status is completed.
- Payment is settled by admin to vendor.
