SAS Certified Visual Modeler Using SAS Visual Statistics 7.4

Suitable for analysts who are using SAS Visual Statistics for exploratory and predictive modeling, model fitting and analysis in a business environment
Successful candidates must be skilled in topics like

? Building and exploring descriptive models
? Building and exploring predictive models with continuous and categorical targets
? Assessing model goodness of fit
? Modifying and comparing models
? Scoring models.
SAS A00-272 Exam Details:
Candidates who earn this credential will have earned a passing score for the SAS Interactive Model Building and Exploration Using SAS Visual Statistics 7.4 exam.

? 50 multiple-choice, short-answer, and interactive questions. Interactive questions simulate the SAS Visual Statistics gui and have that you configure part of SAS Visual Statistics to make a specific visualization. Please visit our FAQ for more info. You should have a score of 68 percent correct to feed.
? 90 minutes to finish exam.
? Use exam ID A00-272; required when registering with Pearson VUE.
? Exam Price: $180 (USD)
? Training: SAS Visual Statistics: Interactive Model Building
? Book: A review of SAS Visual Analytics
A00-272 Exam Topics:
? SAS visual statistics cross-functional tasks
? Building and assessing segmentation models
? Building and assessing regression-type models
? Model comparison and scoring

Exam Content Guide

? SAS visual statistics cross-functional tasks - 18%

0 Prepare data using SAS Visual Analytics

0 Filter data used for a single

0 Use interactive group-by

? Building and assessing segmentation models - 32%

0 Perform unsupervised segmentation using cluster analysis

0 Analyze cluster results

0 Perform supervised segmentation using decision trees

0 Asses decision tree results

? Building and assessing regression-type models - 40%

0 Explain linear models

0 Perform linear regression modeling

0 Perform generalized linear regression modeling

0 Perform logistic regression modeling

0 Assess model results

? Model comparison and scoring - 10%

0 Compare Models

0 Score Models

SAS Visual Statistics: Interactive Model Building

This course introduces SAS Visual Statistics for building predictive models in a interactive, exploratory way. Exploratory model fitting is a critical step in modeling big data. This system is suitable for users of SAS Visual Analytics 7.2, 7.3, and seven.4.

Learn how to use SAS Visual Statistics to..

? perform statistical analysis of internet data of the size

? create an undertaking

? determine useful preferences and settings

? create segments, or clusters, of input variables

? perform regression and logistic regression modeling

? perform decision tree modeling

? perform stratified model fitting

? compare models

? generate score code.

Who should attend

Predictive modelers, business analysts, and data scientists who would like to make the most of SAS Visual Statistics for highly interactive, rapid model fitting
