

Cloudways Review 2022: Features, Pricing & Alternatives

CLOUDWAYS HOSTING REVIEW 2022

01

GREAT SPEED

Not the fastest, but still very fast. They are faster than ever other more expensive hosts. Those coming from a shared host will definitely feel the difference in speed.

02

AFFORDABLE

You get better speeds than other premium hosts at a fraction of the cost. For example, the cost of Cloudways Plan starts at \$10 / month while WP ENGINE is at \$30 Plus. They are only a few dollars more expensive than shared hosts.

03

PAY AS YOU GO

No huge upfront payment. Cloudways allows to you pay each month. so there is no long-term contract. want to leave Cloudways? You are more than welcome to do so on.

04

24 /7 LIVE CHAT SUPPORT

They offer expert support for your server and the cloudways platform. They do not offer support for issues with your theme or plugins though. But that's completely fair.

05

USER-FRIENDLY INTERFACE

They have their own custom control panel that replaces cpanel. It's actually very minimal clean and easy to use.

06

1-CLICK BACKUP & RESTORE

You can setup automated backups (or on-demand) to an offsite location and restore them with one click.

07

SERVER-SIDE SECURITY

No need to install bloated security Plugins. All their servers are protected by OS LEVELS firewall that filters out malicious traffic.

08

HOST MULTIPLE SITES

You can host as many applications as you want. Needless to say, if you are getting much traffic and using too many resources, you'll probably upgrade your server.
