The trolley mounted [Palex ABC Fire Extinguisher](#) is suited for the BC/ABC class of fires, depending on its version. Palladium Safety Solutions offers a variety of dry chemical powder fire extinguishers that may be put on a trolley. Wet fire extinguishers, which use water or foam as an extinguishing agent, are an alternative to dry chemical extinguishers. Because of their huge capacity and weight, these fire extinguishers are also installed over carts. If you wish to acquire a trolley-mounted fire extinguisher or become a Palladium Safety Solutions distributor.
