

IS IT POSSIBLE THAT YOUR STOMACH WILL STRETCH OUT AFTER GASTRIC SLEEVE SURGERY

"It is proven that the new sleeve stomach is 85% smaller than the usual size and has 85% fewer food molecules. Therefore, it is small but durable.

When you get a gastric sleeve in Mexico, you will be starting to feel full even if you haven't eaten enough. As a result, you cannot stretch your stomach too much after a gastric bypass sleeve surgery."
