## **Statement On Virus Isolation (SOVI)**

**Isolation: "The action of isolating; the fact or condition of being isolated or standing alone; separation from other things or persons; solitariness." - Oxford English Dictionary**

The controversy over whether the SARS-CoV-2 virus has ever been isolated or purified continues. However, using the above definition, common sense, the laws of logic and the dictates of science, any unbiased person must come to the conclusion that the SARS-CoV-2 virus has *never* been isolated or purified. As a result, no confirmation of the virus' existence can be found. The logical, common sense, and scientific consequences of this fact are:

- the structure and composition of something not shown to exist can't be known, including the presence, structure, and function of any hypothetical spike or other proteins;

- the genetic sequence of something that has never been found can't be known;
  - “variants” of something that hasn't been shown to exist can't be known;
  - it's impossible to demonstrate that SARS-CoV-2 causes a disease called Covid-19.
-
