Global ePayment System Market was valued at USD 68.83 billion in 2021 and is expected to reach USD 242.35 billion by the year 2028, at a CAGR of 19.7%.

The introduction of electronic commerce (e-commerce) in 1990 provided a new manner of doing business to the consumer and commercial worlds. Since then, e-commerce has evolved and altered dramatically, resulting in incredible benefits for customers and businesses all over the world. The ePayment system is regarded as the backbone and one of the most important features of e-commerce. For making or receiving payments, an ePayment system or electronic payment system, often known as an online payment system, has acquired great acceptance among consumers and companies alike. An effective electronic payment system reduces trading costs and is regarded to be crucial for the operation of capital and inter-bank markets.
