It's possible to install the files from the devices which are Android powered the approach we take to install software using the pc. When one downloads after which installs a software on Android from official sites or other unofficial sites, these are actually installing APK ion the device.

It's possible for someone to set up APK files directly in devices. This can be done without necessarily downloading them from any network. You can use a computer and rehearse different communication programs.

You can even make use of a procedure that is referred to as side loading. Usually, this power to install from websites that aren't official or from the file manager or direct from a desktop comes disabled as a result of different security reasons in several of the Android devices that we have. You are able to enable this through changing the unknown sources settings inside menu.
