BIM LOD 300 refers to a level of detail in building information modelling where the model describes all of the physical and performance attributes of the building. At LOD 300, the model contains all of the architectural, structural, mechanical, electrical, and plumbing systems, as well as all of the equipment and fixtures.

We provide a wide range of BIM LOD services like LDO 100, LOD 200, [BIM LOD 300](#), LOD 400 and LOD 500. If you are looking for BIM LOD Services for your building Get In Touch With Us.
