

Extramarks the Best IIT JEE Test Preparation App Available Online

Various coaching centers are available in the market for JEE preparations. Many IIT JEE test preparation apps are also available on the internet. It is very difficult to choose from such a wide range of options. Also, not all sources are reliable. While preparing for such an important exam, it is very important to diligently choose the right guidance/ study material. As per the recommendation of many students, teachers, and time-proven results, Extramarks- the Learning App is one of the leaders in the market for IIT JEE Exam preparations. This app provides comprehensive study material, personalized guidance, 24/7 support, and much more at just a click of a button. This app is not called “One Stop Learning Shop” for no reason. Very experienced and qualified teachers are associated with the app to provide the best learning experience to students. These teachers have prepared intensive study material for ease of students. These include well-explained e-notes, animated and informative videos, interactive live lectures, well-designed sample, and guess papers, and a collection of previous years’ papers.

One IIT JEE test preparation app that I suggest to almost all the students is Extramarks- the Learning App. The pedagogy of this e-learning portal is the best in the country; they employ innovations in technology and deliver the best study material online. Industry icons and superb teachers from IITs are associated with the app to train brilliant, young aspirants for their aspiration to achieve their dream college. Recently, they also organized [Extramarks Young Scholars Exam](#) in which students can get up to 100% scholarship on their fees based on their performance in this test. This test is conducted on a national level and the best performing and eligible students get up to 100% scholarship on their fees to study from the app. Isn't it amazing? This app is definitely not money-minded but genuinely provides the best assistance for students who are capable and aspire to achieve the best.

Extramarks work on the 3-step approach of teaching-

1. Study concepts, solve problems, and look at solutions.
2. Solve previous year's papers.
3. Take timed practice test series

Students can refer to their well-consolidated e-notes, animated videos, live lectures, textbook solutions, etc. to build a better understanding of basic concepts for students which not only helps them to crack the IIT JEE mains exam but also in their forthcoming future.
