

# Ivory Spice Granite

## [Ivory Spice Granite; Creamy Surface that Fits Every Home](#)

[MATERIALS](#)

[Work-tops.com](http://Work-tops.com)

[Ivory Spice Granite](#) comes with a cream background with tiny grains that adds a special effect to the stone. The sealant added to the granite gives a more reliable performance of keeping the spillage during cooking from being absorbed into the grains. An immediate wiping is recommended to prolong the life of the granite worktop.

## **What Colour Cabinets Fit Your Cream Countertops:**

**Cabinets in Grey**

To keep your Kitchen neutral, grey cabinets are a terrific choice. The warm cream-colored counters and grey cabinets provide warmth to your Kitchen while elevating its style.

You can notice how wonderfully the grey cabinets complement the cream in the shot below. This Kitchen is made neutral and inviting by the cabinetry, combined with a white subway tile backsplash and stainless steel equipment.

## **White Cabinets**

For kitchens, white is a fairly common colour option. White cabinets have advantages and disadvantages that should be considered before choosing this hue. Neutral hues allow for more personalization in other areas of the Kitchen, which is a big plus. After the renovation, you won't feel your Kitchen needs to be updated because neutral colours always go out of style.

### **Black Cabinets**

Black cabinets are another choice if your [cream kitchen](#) leans toward the darker side. As you can see, the Kitchen in this picture initially appears to be rather dark. It's crucial to remember that black is also trendy, even though some people want their kitchens to be on the lighter side.

### **Brown Cabinets**

Brown cabinets are a terrific method to give the Kitchen a more natural foundation without adding the wood's texture. As you can see in this Kitchen, the combination of cream and brown provides a space with a warm, airy, and earthy vibe while also keeping it contemporary.

# What Makes Granite Counter an Excellent Choice for Your Home?

## Adds a Distinctive Appeal

The polished, sparkling surface of granite gives the room a sunny aspect.

## Hygienic

[Granite](#) is bacterial resistant, making it perfect for every space, but notably, the Kitchen, where it can be used for cupboards, kitchen islands, and countertops.

## Heat-Resistant

Granite is a natural stone that can withstand heat since it was created under intense pressure and at a high temperature. Granite is thus a suitable material for every table, including dining tables.

## Incredibly Robust and Resilient

The high strength and durability of granite make it one of the best materials for various components in your Home. Everything in your Homemade granite will last a lifetime.

## Applications of Ivory Spice Granite:

### Kitchen Backsplash

You can use the exact stone for the backsplash even if you already have a granite countertop. In addition to saving time and money, it will create a pleasing visual continuity.

### Dining Table

A granite dining table will give your dining space life and character. It can be used in various ways, such as a single slab or in combination with other slabs. Granite dining tables are also helpful because you can set hot pots and utensils straight on the tabletop due to their heat resistance.

## **Flooring**

Granite is a suitable material for flooring due to its strength and longevity. Its surface or colour won't even deteriorate over time. Additionally, it enhances your Home's splendor and elegance. Since it resists microorganisms, families with allergy issues can use it.

## **Sinks**

Granite is one of the most excellent materials for sinks since it is sturdy, durable, nonporous, scratch- and heat-resistant. Since it is available in a variety of colours, you get a sink that is not only useful but also attractive.

## **Bathroom Walls and Vanity Tops**

Since bathrooms are frequently misused, a solid wall and a granite vanity top may be the best option. Granite is the ideal material to use in bathrooms since it is water and mold resistant, nonporous, and keeps out bacteria and other microbes.

## **Tabletops**

Granite is ideal for tabletops or desktops because it is so robust and gorgeous. Whether it is your dining table, office table, or study table, the natural stone adds a stylish appeal to any table.

#### **Maintenance of Spice Granite:**

Granite requires sealing like any other natural stone to achieve a nonporous finish and stain resistance. It should be well sealed upon installation, but it will need to be sealed again at least once a year. Granite countertops in lighter colours may not require sealing as regularly as those in white granite, which is more likely to reveal stains. Splash a few drops of water on your granite countertop to check if it needs sealing. Your countertop is in excellent condition if the water beads up. Re-sealing is required if the water has been absorbed. The technique of applying sealer is easy. Make sure the counter is first spotless and dry. Apply the sealant with a dry, clean cloth on the packaging. Apply a second layer when the first has dried.
