

Level Of Development BIM Services

Silicon Valley offers a range of [Level Of Development BIM](#) services, including LOD BIM 300, LOD BIM 400, and LOD BIM 500. At LOD BIM 300, the model provides accurate size, shape, and location information, suitable for early design stages. LOD BIM 400 adds more elements and details, ideal for construction and coordination purposes. Finally, LOD BIM 500 includes all necessary information for facilities management, allowing for data integration related to maintenance, operation, and future renovations. Silicon Valley ensures that their BIM models meet industry standards and support various stakeholders throughout the construction process.

Following are the Level Of Development BIM services:

- BIM LOD 100
- BIM LOD 200
- BIM LOD 300
- BIM LOD 350
- BIM LOD 400
- As-Built BIM LOD 500
