## [Galaxy Stone for Timeless Interior Spaces](#)

[MATERIALS](#)

[Work-tops.com](https://www.work-tops.com)

From the elegant luxury of a period drama to chic modern minimalism, stone surfaces come in a wide range of designs and patterns. Stone is, in many ways, the ideal material for use in almost all kinds of surfaces, from the bedroom to the bathroom, from indoors to outdoors. In this article we shall be learning some beautiful surface materials having different coloured surface backgrounds but with Galaxy stone patterns that are applicable for renovation projects.

### **Granite Black Galaxy Stone**

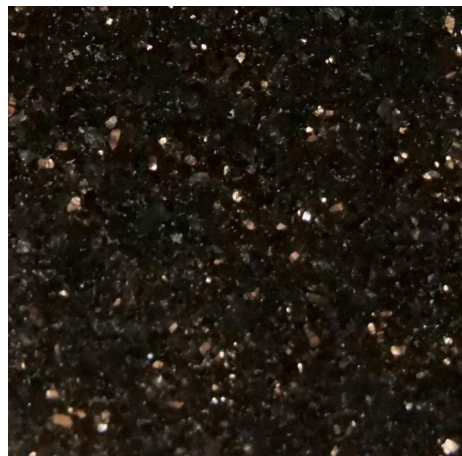

Black Galaxy Granite, when viewed from a distance, appears as a solid-rich black slab. From close up, one can notice that the dark black background houses several thousands of gold and white dotted flecks. The distribution of consistent glimmery speckles over the dark surface gives it the look of an unending galaxy in a pitch black space of darkness.

[Granite Black Galaxy](#) is available at Work-tops in 20mm thickness and 30mm thickness, in polished and vintage finishes.

## Black Star Galaxy Granite for Timeless Kitchen Worktop

This gorgeous granite makes excellent kitchen worktops because of its qualities like heat resistance, stain resistance and durability.

## Quartz Cream Galaxy Stone

The gorgeous stone Cream Galaxy quartz is beige in colour with tiny, evenly dispersed black spots. It is an excellent indoor surface material that can be applied to many different types of decor. Because of its high durability, non-porousness, stain resistance, and resilience to water and moisture, it is a great solution for many corporate and official settings in addition to residential kitchens and bathrooms. So, if you're looking for a brilliant work surface, Cream Galaxy quartz is the ideal option.

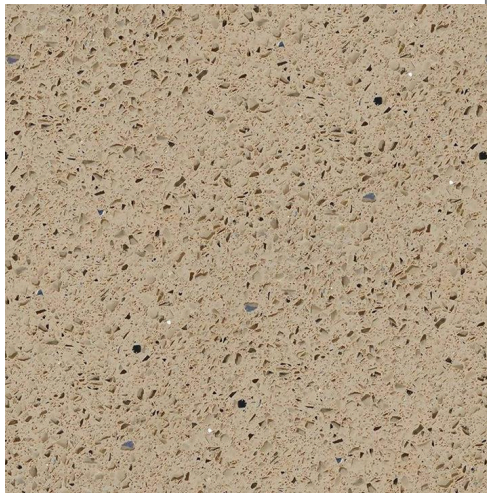

We offer this [Quartz Cream Galaxy](#) slab in two sizes and thicknesses that are 3200 \* 1600 and 3000 \* 1400, and 20 mm and 30 mm, respectively.

**Cream Galaxy Stone for Timeless Interior**

This Beige coloured cream Galaxy will add a sense of sophistication and warmth to your interior space, thus making it a timeless classic.

## Granite White Galaxy Stone

Each slab of White Galaxy granite is made of white stone with veining that is a mixture of black, brown, and white. The veining in this stone is quite faint and delicate; but, when the veining from the different colours are combined, the interweaving of colour becomes almost dramatic.

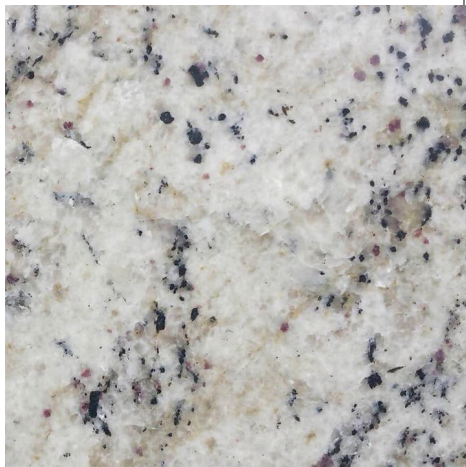

[Granite White Galaxy](#) is available at Work-tops in 20mm thickness and 30mm thickness, in polished and vintage finishes.

## Granite White Galaxy Table for Kitchen

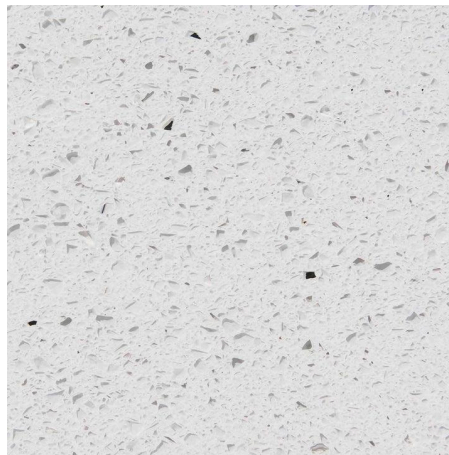

This gorgeous granite is an excellent choice for your kitchen table to be used as a kitchen island. Its white background will make your kitchen look bright and beautiful.

## Quartz Grey Galaxy Stone

The quartz slab known as Grey Galaxy Stone is a light grey colour with a continuous pattern of black and darker grey dots. Since the quartz slab's overall appearance resembles the Universal Galaxy, the word "galaxy" is used to describe it. The consistency of your decor is enhanced by the elegant grey colour of the stone.

At Work-tops, we offer this [grey Galaxy Quartz](#) in 20mm thickness and 30mm thickness.

### Grey Galaxy Vanity Set

As Grey Galaxy Quartz is manufactured to have commendable moisture resistance, it makes one of the best choices for your bathroom vanity set. The grey colour sprinkled with galaxy-like dots make the aesthetic appeal even more inviting.

### Bianco Galaxy Quartz

Featuring tiny black flecks, Bianco Galaxy Quartz is a white quartz stone slab. Natural quartz, one of the toughest stones on Earth, is used to manufacture Bianco Galaxy Quartz slabs. Tiny crystal or metallic bits are added in minute quantities to produce a stunning appearance. This quartz has the benefit of being a non-porous material; its surface prevents bacteria from growing; it resists stains, and it makes kitchen cleanup simple. Surfaces made of Bianco Galaxy Quartz don't require sealing after installation because of this reason.

At Work-tops, we offer this [White Galaxy](#) Stone in 20mm thickness and 30mm thickness.

## **Bianco Galaxy for Modern Bathroom**

This gorgeous shiny quartz is an excellent choice for your modern theme bathroom. Its polished, glossy finish will give your bathrooms a sleek and smooth vibe, so don't think twice, just go for it.
