Both types of chairs are comfortable in their own way. But having an armrest chair is more supportive than a chair without an armrest.

Benefits of having an armrest chair:

Important reasons to use armrests:

- **Support your arms and relieves loads on the neck and shoulder.**

- Helps in maintaining good posture.
- Supports your body weight and reduces the stress on the back
- Supports lower limbs
- Help to prevent excessive pressure on the seat as it divides half of the pressure on armrests.
- Helps to work easily with support.
