

# Best Gynaecologist in Bhubaneswar

Gynaecology is a branch of medicine that deals with the reproductive system of women. Almost all obstetricians and gynecologists in today's world are also gynecologists. In many ways, the fields of gynecology and obstetrics overlap. The study of women is referred to as "women's science."

## **What exactly does a gynecologist do?**

A gynecologist is a specialist who specializes in women's reproductive health. They diagnose and treat female reproductive system issues. They deal with obstetrics, or pregnancy and childbirth, as well as menstruation and reproductive difficulties, sexually transmitted infections (STIs), hormone imbalances, and other issues.

## **Fast facts about gynecologists:**

Here are some key points about gynecologists.

- A gynaecologist is a doctor who focuses on the health of the female reproductive organs.
- Many women begin seeing a gynaecologist as early as their adolescence and continue to see a well-woman clinic for general health concerns.
- Women should see a gynaecologist at least once a year for a checkup and whenever they have symptoms that concern them.

## **Common procedures:**

gynecologists are trained to carry out certain diagnostic and surgical procedures.

Diagnostic tasks include:

- Pap Smear Tests
- Ultrasound scanning
- Colposcopy, a microscopic examination of the cervix
- Endometrial Biopsy, or taking a sample from the lining of the uterus
- Hysteroscopy, the use of an endoscope to see into the uterus

Surgical tasks include:

- Preparing patients for surgery
- Laparoscopy, a keyhole abdominal procedure. for both diagnostic and surgical purposes
- Minor surgery, for example, sterilization
- Major surgery, for example, removing fibroids in the uterus
- postoperative care, including treating complications

To keep your reproductive health in control, you should see your gynaecologist on a regular basis. Depending on your health history and age, your gynaecologist may utilize this visit to screen for concerns such as cervical or breast cancer. During your well-woman visit, you can also ask the gynaecologist about reproductive health issues such as birth control.
