

# Quality DC Motors at DHMotor - Manufacturer & Wholesale

# DC MOTORS

## DC MOTORS

Welcome to DH Motor, we've got you covered for all your DC Motor needs! From prototyping to mass production, and even jigs, tools, and test equipment, we'll take care of it.

## DC MOTOR TECHNOLOGIES

We design and manufacture motors as components and motors within complete mechanism assemblies. In both cases, when working with DC motors, we use four different technologies

## TYPICAL DC MOTOR FORM FACTORS

Irrespective of the DC motor technology used there are some common form factors and design influences that are commonly used in applications across all industries.

## ● TERMINALS AND CONNECTOR PINS

Connecting the motor to the application is clearly critical. We typically use soldered pins, spring pad connectors and integrated connectors.

## ● LEADS AND CONNECTORS

Wires and leads are frequently used to electrically connect motors in application. We offer different lengths, gauges and pre-fitted connectors.

## ● FRAME MODIFICATIONS

Securing motor frames to your application can be done in many forms. Custom fastening points and brackets are commonly used.
