Our Philosophy:

Less Memorising, Better Understanding

The strong emphasis on understanding concepts is our underlying teaching philosophy. We drive students' interests, giving them scaffolded practices, and subsequently foster a stronger foundation for this challenging subject.

Strategized teaching methodology matters but quality study material is also crucial for better understanding. Specially curated materials and personalised notes will be provided to expedite the learning progress. And, you will also be given designed practices and exercises to apply the learned concepts in different scenarios.
