

Cenforce VS Viagra: USA Well-Known Drug

<u>Cenforce vs Viagra</u> To get directly to the point, Cenforce 100 is a Viagra-like drug used to treat erectile dysfunction in adult men. Sildenafil citrate is the active component in both Cenforce and Viagra. Cenforce is a well-known Viagra alternative for the treatment of erectile dysfunction. Please bear in mind that Cenforce is a prescription medicine that requires a doctor's prescription to obtain.

The safest dose is 100 milligrams of sildenafil. If Sildenafil 100mg isn't working, you should try a different ED medication. Cialis and Spedra, two more ED drugs, have different active ingredients than Sildenafil but have a similar effect. The difference between <u>cenforce vs</u> <u>viagra</u> is insignificant.
