Type	Suitable for Channel	Thickness
SCS	CHS (TS 32)	11 mm
SCSN	CHS (TS 32)	8.4 mm
SCKN	CHK (TS 35)	8 mm
SCUN	CHS (TS 32)/CHK (TS 35)	9.5 mm
SCUDD	CHS (TS 32)/CHK (TS 35)	10 mm
SCUSL	CHS (TS 32)/CHK (TS 35)	8 mm
DCKN	CHK (TS 35)	6 mm
SCMN	CHM (TS 15)	7.5 mm

VARIOUS TYPES & USES OF TERMINAL BLOCK ACCESSORIES

A terminal block in an insulated frame is a modular block used to secure several wires. There are numerous varieties of terminal blocks available on the market, as well as a variety of accessories. We will swiftly learn about various types of Terminal Block Accessories in this article. Elmex is a pioneering firm that manufactures and distributes top quality electrical wire technology goods and appliances.

- **Group / Warning Label Markers:**

Group Markers are used to identify a collection of terminal blocks. These are attached to end clamps and fastened on label holders.

Warning label markers, on the other hand, are used to designate circuit connections.

Elmex Controls Pvt. Ltd. one of the most popular [Terminal Blocks with brass manufacturers](#) in India.

- **End Clamps:**

End Clamps are used to securely retain terminal blocks on mounting rails. End Clamps come in a variety of sizes, forms, and styles. Elmex End Clamps are typically composed of mild steel with dual plating or polyamide.

- **DIN Rail Channels:**

DIY Rail Channels are commonly used to mount terminal blocks, control panels, and circuit breakers. Gauging is performed during the manufacturing process of DIN Rail Channels because dimensional correctness of DIN Rail Channels is critical.

Elmex Controls Pvt. Ltd. is one of the distinct **MC manufacturers in India**.

- **Protection Covers:**

Electric shocks are avoided with the use of protection covers. When the terminal end points do not form a proper assembly, a risk of electric shock exists, and Protection Covers are utilised.

- **End Plates & Barrier Plates:**

End Plates and Barrier Plates are the two types of terminal block accessories on the market. End plates are available in a variety of colours.

Elmex Controls Pvt. Ltd. is one of the leading [Solar PV Connector manufacturers](#) in Gujarat.

Barrier Plates are used to differentiate terminal groups in a stack, to separate terminal blocks, and to increase the space between appliances.

Elmex Controls Pvt. Ltd. is a distinguished **Brass Terminal manufacturer in India**.

- **Interconnecting Links:**

Interconnecting Links are used as an alternative for lopping wire to link two or more terminal blocks. Interconnecting Links can connect terminal blocks with the same potential. Shortening links are another name for interconnected links.
