

Stationary Ready Mix Concrete Plants - Stationary Rmc Plants - Atlas Technologies

In our ready mix concrete (RMC) plants. The aggregates are stored in horizontal bins. The [stationary concrete batch plant](#) type machines come with gathering conveyor below the aggregate bins. Here the weighing of aggregates takes place. Then the aggregates are discharged into the slinger conveyor where they are transferred to the twin shaft mixer. Atlas ready mix plant come equipped with twin shaft mixer as mixing device and hence they are bound to perform for years.
