What Is Parallel Profits?

Parallel Profits teaches a business model that is without doubt one of the fastest ways to generate a full time living working from home. In fact, you only need as little as 7 "sales" to create a \$100,000 per year run-rate.

The business model is selling simple services to local businesses but with three BIG twists that make this product (and launch) completely unique and different to anything ANYONE has done before.

1. People who follow the training will be invited to work together with us as part of a franchise. This means they won't need to worry about creating a brand, domain name or website. Neither will they need to worry about copywriting or marketing materials. Everything will already be set up and ready to go so they can secure their territory and start making sales with immediate effect.
2. When they secure local businesses as clients, they won't need to perform, or even outsource any of the services that they will be offering to them. Why? Because there will be a full team in place to do all the work for them, eliminating the need for experience or expertise.
3. Thanks to the unique client capture system and as a benefit of partnering with us, customers of Parallel Profits won't even need to have any face to face interaction with customers, or do any selling at all, thanks to a variety of built-in lead-gen systems and processes!

These three "twists" will remove almost all the usual roadblocks that people hit when trying to build a business, make the model highly scalable and subsequently will dramatically increase their chances of success.

Having said all that, the product will ALSO deliver full training on this business model, so if people want to go it alone, they can absolutely do that.
