

Fistula Treatment in Aurangabad? Find At Shree Samarth Piles & Pain Clinic

Fistula pain can be permanently impacting your daily life. At Shree Samarth Pile & Pain Clinic in Aurangabad, we understand the physical and emotional toll this condition can take. The good news for you don't have to suffer in silence. We offer advanced laser surgery, a minimally invasive and effective solution for conquering fistula pain.

What is a Fistula?

A fistula is an abnormal connection between organs & tissue. In the case of anal fistulas, it's a small tunnel connecting the anus to the skin near the buttocks. This connection can cause a variety of uncomfortable symptoms, including:

- Pain, especially during bowel movements
- Pus drainage from the fistula opening
- Itching and irritation around the anus
- Difficulty controlling bowel movements
- Incontinence

Traditional Fistula Treatment Options

Traditional fistula treatments often involve surgery with scalpels. While effective, these procedures can be:

- More invasive
- Cause significant discomfort and pain during recovery

Laser Surgery: A Modern Solution

At [Shree Samarth Pile & Pain Clinic](#), we offer advanced laser surgery as a minimally invasive alternative for treating fistulas. Laser surgery offers several advantages:

Minimally invasive: Laser treatment allows for precise targeting of the fistula tract with minimal damage to surrounding tissues.

Reduced discomfort: Laser surgery generally causes less pain during and after the procedure compared to traditional methods.

Faster recovery: Minimally invasive techniques often lead to faster healing times and quicker return to normal activities.

Reduced risk of recurrence: Laser surgery helps seal the fistula tract more effectively, potentially reducing the risk of recurrence.
