It is a popular set-top box for IPTV. It has a lot of features. But most of us do not know that apart from telecasting channels, this **XTV Pro** has a lot of features to offer. And the installation process is rather simple. In this article, we will give you a brief view of this set-top box and also fill you with striking features.

Let us begin:

Features

1. It offers various open and closed live TV channels.

2. Stream videos, web series, live TV shows, etc.

3. Great interface, so it is easy to use.

4. Android-based devices

5. Highly compatible with smart TVs, and Android boxes

6. It works fine with voice assistants with ease.

7. It offers the Google Play store to download and uninstall apps on the go.

How to connect with IPTV?

Step 1: Use an HDMI cable to connect the XTV Pro set-top box to your TV.

Step 2: Ensure that the adapter is plugged into a power source and that the other end is plugged into the appliance.

Step 3: Turn the set-top box on.

Step 4: Carefully complete the first setup now.

Step 5: Please confirm that your WiFi is active and connected to the STB.

Step 6: After setting up the set-top box, you may download the apps you desire from the Google Play Store and begin streaming live videos, web series, and movies of your choosing.

Installation guide for Android devices

Step 1: Launch the Settings app on your Android smartphone or tablet.

Step 2: At this point, select Security and Restrictions.

Step 3: Activate the Unknown Sources setting.

Step 4: Launch the browser and look for the XTV IPTV APK.

Step 5: Choose any trustworthy sources, then press the "Download" button.

Step6: Install the IPTV app in step six.

Step7: Then, launch the IPTV app and start streaming the live TV stations.

Installation Guide for Desktop

Step1: Get BlueStacks and set it up on your computer.

Step 2: Download the XTV IPTV APK on your device as well.

Step3: Click the My Apps tab in the BlueStacks program.

Step4: Install the app by dragging and dropping the XTV IPTV APK.

Step5: Open the XTV app by selecting the My Apps menu.

Step6: The IPTV material will begin loading.

Installer's Guide for the Fire Stick

1. On the home screen, select the Find option.
2. "Once you have your order, you may set it up independently."
3. Use an HDMI cable to connect the set-top box to your TV.
4. Ensure that the adapter is plugged into a power source and that the other end is plugged into the appliance.
5. Now, switch the gadget on.
6. Finish the preliminary setup.
7. Verify that your device is linked to a WiFi or internet network.
8. Once the setup is complete, install the desired apps and begin streaming.

Conclusion The installation process is rather simple for this device and the features are rather top-class. And can be easily installed on several devices hassle-free.
