# Choose e-invitation over traditional invitation

A wedding can be the most beautiful ceremony of our lives; it's a ceremony that binds two souls for all 7 births according to scriptures, thus it happens only once and is the most important day for the bridegroom.

The various traditional rituals such as Ganesh pooja, ladies sangeet, 7 fere, reception, and baarat among the various small and big rituals spark us with excitement and what other thing can mark the beginning of that happiness than a wedding card.

Earlier people used to distribute traditional printed wedding cards personally to each guest, but now times have changed, with the emergence of the internet, we have our priorities, now the internet is the new social and e-invitation came with it, so with that being said, here's why you should choose e-invitation over a traditional one.

Advantages of e-invitation

Time saver: - The biggest advantage of digital invitation is that you can create it from anywhere, forget going to the card printers over and over again, telling them your priorities plus it removes the waiting time that it takes for a wedding card to be finished since e-cards can be created within minutes.

Other than that your guests can immediately respond to an invitation sent by mail, overall you can easily pay attention to wedding preparations.

Lots of customizations: - With traditional cards there is another problem of limited choices regarding details and designing, on top of that you may have to pay extra which is not acceptable.

But when it comes to an e-invitation you can get tons of customizable templates that include, font styles, a personalized message, multiple designs, and whatnot that you can play around with till it matches what you had in mind and not even pay extra.

Money saver: - Like we mentioned before, traditional wedding cards can cost you a lot as you also have to pay for stamps if you want to send a card outside the city, state, or country you are living in, even if you don't have guests outside your area (which is a rare case), you will get indirect costs such as petrol or taxi costs.

E-invitations are a cheap yet amazing solution, sending e-wedding cards save all direct and indirect costs which you can later use for other endeavors as well.

If you like the idea of e-invitation but want the feel of traditional wedding cards, we have got customizable digital **Laser Cut cards** and **Scroll Wedding Cards** among the many at affordable prices.

Save our planet: - You can save our trees and indirectly save the earth if you buy e-invitation.

Just think about it, wedding cards are made from paper and that paper is made from trees, so you are responsible for getting so many trees cut when you buy paper wedding invitations.

That's why we at sevencolourscard.com encourage you to buy **Digital Marriage Invitation Cards** and save our planet.

Manage your guest list: - Indian wedding ceremonies are grand and like all other grand things this ceremony also requires your full attention for going smoothly, but how are you going to pay full attention, if you are busy managing the list of guests.

Some **Indian Wedding Invitations** making companies provide you with the feature of digitally managing your guests by providing easy to use tools that are customized from the forms filled by you.
