Dr. Heena Agrawal
Infertility & IVF Specialist

With nearly one-third of all infertility diagnoses in women, polycystic ovary syndrome, or PCOS, is the most common ovulatory disorder in women of reproductive age. “While myths persist that women with PCOS cannot get pregnant, the reality is that it is highly treatable and nearly every woman with PCOS should be able to get pregnant,” explains

Dr. HEENA AGRAWAL, medical director, Dr.Heena’s Fertility Center Indore Madhya Pradesh. “In fact, many women will experience increases in fertility through lifestyle changes and modest weight loss.
