

# Editable Ecology World PowerPoint Presentation Slide

## Ecology World

- The meaning of the word ecology was given by German Biologist Hackle in 1869.
- The word ecology is derived from Greek words 'Oikos' meaning house, habitat or place of living and 'Logos' meaning to study.
- Ecology is defined as the study of interrelationship of different organisms with each other and with their environment.
- It is concerned with the general principles that apply to both animals and plants.

Download this [Ecology World](#) PowerPoint Template to discuss about ecology and the environmental issues on our planet. It is a unique and 100% editable ecology theme slide. The design is eye-catching and contains many illustrations. It is a good choice for an educational presentation or an awareness campaign that encourages people to save the planet.
