

# EUROPE AIRWAY CLEARANCE SYSTEM MARKET 2019-2028

An analysis by Triton Market Research has concluded that the European airway clearance system market is expected to grow, and expand at a CAGR of 4.38% during the forthcoming period 2019-2028.

The countries evaluated in the Europe airway clearance system market are:

- Italy
- The United Kingdom
- Germany
- Russia
- France
- Spain
- Rest of Europe

In the United Kingdom, there is a considerable increase in research and development activities for the development of airway clearance systems for treating cystic fibrosis and other respiratory disorders. New product launches in the market are likely to create new business opportunities for market expansion in the country. It is reported that, currently, about 1.2 million people have been diagnosed with chronic obstructive pulmonary disease (COPD). The prevalence of this disease has increased by about 27% in the last decade. In addition, there is an alarming occurrence of disease asthma and its associated deaths. This factor is likely to increase the adoption and demand for airway clearance systems in the country. All these facts are expected to drive the studied market during the forecast period.
