

# Covalensedigital Helps Singapore MVNO Achieve Faster System Recovery

Initially, Covalensedigital helped the client digitally revolutionize the global multi-trillion-dollar telecom sector.

We facilitated the client's transformation into Asia's fully digital telecom and consumer company in Singapore.

Having successfully completed the digitalization, the pleased client selected us for a second digital initiative.

In this subsequent project, we implemented a disaster recovery solution for our loyal client.

The solution comprised a data guard for zero data loss and synchronized billing, pricing, and charging data.
