

## Find Your Love in Covid-19 Pandemic

Before the COVID-19 pandemic, the online-dating protocol was to move from a brief chat via the app to date, as quickly as possible after mutually swiping right. But now, with no end to the pandemic insight, dating-app creators are looking for ways to prolong safe virtual relationships for weeks, even months, stretching their roles from matchmakers to love nurturers.

At [Zing](#), from the beginning, we have always tried to make the app smoother and easier to get you a perfect partner to begin your love life. With instant matching and chat features, you can find your people without tiring out your thumbs.

Singles are facing special challenges during this pandemic. In a pandemic, the internet becomes the only way to continue meeting new people, but the actual dating part becomes nearly impossible due to social distancing, isolating, and the threat of a deadly virus.
