Come and experience an entertaining phenomenon that is gaining popularity worldwide. You can play as a couple, with a group of friends, like an unconventional family walk, or even create a Corporate Team.

Puzzles are created to be smart and ingenuity to challenge and also to have fun and to surprise you, by immersing yourself in a world you have never seen before.

Do you admit the last time you shut down the Laser security system in the vault or fled prison?

Why come into the maze – Real Escape Games

We created **Escapers** because we like to develop crazy ideas and especially bring them to life. We are passionate about what we do.

When we first thought of the idea of a room filled with lasers as in the cinema, we laughed loudly. Others have told us that it won't work, that we can't do it. So we have a Laser, you ask? We're doing it. :) We strive to realize our most daring visions and give them a truly unique experience.

We think you like our two games.

We would like to thank all our loyal visitors.

A little history for Escape Room ...

Quests were inspired by computer games where you need to find clues and objects to develop further.

In 2008, the young Japanese Takao Kato introduced this concept in the world, and built the first escape room in Kyoto. In 2011, some rooms were built in Singapore and Budapest (the first in Europe). In 2013, it appeared in the Silicon Valley in the USA, and then spread quickly around the world.

From 2016, more than 3,000 games worldwide will be registered in Quests.
