

Visit Burj Khalifa Tallest Building in the World

Burj Khalifa Tallest Building in the World & Tourist Attraction

The [Burj Khalifa](#) is the world's tallest building and a global symbol. The edifice, which is truly a feat of engineering, reflects the city of Dubai's conceptual heart and soul.

This majestic skyscraper, which stands at 828 metres tall and is located close to The Dubai Mall, has attracted visitors from all over the world since its opening in 2010. The unrivalled Burj Khalifa view may be enjoyed from two observation decks: the two-story At the Top on the 124th and 148th floors, and one of the world's highest observation decks (555m) on the 148th level.

The Observation Deck at the Top

Seeing the sights from the world's tallest building is a must-see event, and the most popular method to do it is to visit the "At the Top" observation deck on the 124th floor (1483ft). Once on the platform, look for high-powered "viewfinders" that help bring even distant developments into focus (on clear days) and cleverly mimic the same view at night and in the 1980s. Six digital telescopes employ HD cameras with a high zoom to focus on locations outside of the metropolis. To get to the deck, you must pass through several multimedia installations before boarding a double-decker elevator that travels at 32 feet per second.

At the Top of Sky's

You must purchase tickets to "At the Top Sky" on the 148th floor to genuinely be on the world's highest observation platform (1820ft). A visit here is structured as a hosted VIP experience, complete with drinks, a guided tour, and an interactive screen where you can "fly" to various major sights by hovering your hands over high-tech sensors. Following that, you'll be taken to the 124th floor, where you'll be bombarded with Burj trivia and a new feature called "A Falcon's Eye View," which allows you to experience a simulated flight over the emirate by swooping over important landmarks like a bird.

BURJ KHALIFA
