- **Colour**

Colour is an aesthetic option to make your living attractive it can also influence the entire mood and feeling of a space. Not only the visual preferences but also, the sort of energy or attitude that you want to cultivate when choosing a colour scheme for your space.

- **Form**

Form or shape conveys the patterns of any artwork, furniture, or 3-D object you could comprehend. Furniture, statue, and even rooms themselves can embrace two categories of forms. And forms Make the space more attractive and significant.

- **Light**

Quality lighting is indispensable to any space, whether its conceptions are natural, man-made, or some collection of both. When deciding on lighting for your room, think about characteristics like the colour of the light emphasis.

- **Line**

Design experts say that horizontal lines solidify a feeling of security, while vertical lines are meaningful and bold. Dynamic lines, which follow their own set of ordinances, can add leisure, fascinating touch to any space when adopted strategically.

- **Pattern**

A pattern is the intentional repetition of forms, lines, or additional design elements. Patterns usually flinch on wallpaper or fabrics but can seem anywhere in the living, even in the use of light or other design components. While patterns can add vitality and gesture to an area.

- **Texture**

Careful deliberation of texture is particularly valuable in parts of the home that you connect frequently, like your flooring. We can assist you to find floors with the perfect, comfortable texture to begin every day on the right foot
